## ABOUT ME

The moment I wrote my first “Hello World!” in the console it opened my eyes to the possibilities of software development, and it quickly became a passion of mine. The process of making high quality software come to life with my own two hands is something that excites me and that I can see myself doing for the rest of my life.

For the last two years I have been studying and learning multiple coding languages and frameworks. Below you’ll find the projects I have completed that showcase separate skillsets. The projects are featured on my portfolio page as well.

## PROJECTS

### PRACTICE WEBPAGE

This webpage is an example of a professional website. It utilizes HTML, CSS, and JavaScript.
